Name of Committee: Technology Committee

Purpose of Committee: The Technology Committee was created to allow for increased outreach to and participation of our technological chapter members as well as sharing technical information with other chapter members. Technology committee members would include, but not be limited to, personnel working on or with telephony, CAD, I/T, Radio, MSAG, GIS, etc. The Technology Committee may be called upon to create a response from the chapter related to technology issues, discuss and identify training needs within the chapter, recommend training options for chapter members in technology related fields, etc.

Goals:

- Recruit committee members
- Establish standing meeting date/time
- Develop a mission statement and strategic plan
- Submit articles for the “Tech Talk” feature in the Chapter newsletter

Committee Objectives: The Committee works to bring together Members who are interested technology and advancements that impact the 911 industry in Washington State.

Committee Responsibilities:

- The responsibilities of the Technology Chair include reaching out to technological members through welcoming new member emails, informational bulletins, or other topics, coordinating technical articles for the monthly chapter newsletter series “Tech Talk”, providing input on training topics of interest/need within the membership and encouraging participation of technology related chapter members in chapter activities and other outreach. The Technology Committee Chair is the face of technology for the chapter and is expected to assist with getting members in touch with others who can help with questions.

Date Committee was established (if known): 2012
